Halesworth Library, Halesworth, Suffolk

Internal roller and vertical louvre blinds

Vertical louvre blinds model V080 and heavy duty roller blinds in matching contract fabric, Colourtex Azure.

Installed direct for the Client, Suffolk Library Service.

Town Council meetings were being held on a first floor open plan area, which had an open aspect to the public areas below, which was creating a privacy issue. The Client was also experiencing uncomfortable levels of solar gain and glare through the floor to ceiling front elevation glazing. This aspect was difficult as the windows were over stairways, and also curved around the building.

Nantmor manufactured a quantity of model V080 vertical louvre headrails that were produced to exactly follow the horizontally curved glazing. Heavy duty gear operated rollers were installed over the balcony area to afford further internal privacy to the users of the open plan area.
