

Clifftown Studios Southend-on-Sea, Essex

Project Reference

Products Installed:

RL21 manually operated and RL26 framed blackout roller blinds. Manual operation RL01 rollers, rooflight rollers and motorised Lightex rooflight blinds.

Project Details:

The challenge here was an old church building with high level and clerestory windows, large glazing and sloping rooflights.

Nantmor Blinds used their extensive roller blind programme to provide manually operated and motorised solutions to all the glazing in this historic building. All blinds used heavy-duty, flame retardant, blackout fabric. The motorised blinds were controlled by radio controlled motors with wireless switches to avoid unsightly cables and trunking.
