

Endeavour House (Suffolk County Council) Ipswich, Suffolk

Products Installed:

Verosol manually operated roller blinds using high performance SilverScreen fabric to south elevation. Anti-glare roller blinds to north elevation.

Project Details:

Since this building was constructed there has been an issue with excessive heat gain and glare on the south elevation with many shading options investigated by the Council.

Nantmor Blinds supplied and installed manually operated Verosol roller blinds with a metalised coating on the reverse of the material which provides unrivalled performance in terms of heat rejection, light control and yet still preserving a view to the outside. Nantmor adapted the existing blinds for use on the north facade.
