

Harwich School Harwich, Essex

Project Reference

Products Installed:

RL01 Manual dim-out Roller Blinds, TESS 120 Motorised tensioned roof roller system, flame retardant stage curtains.

Project Details:

This school hall needed to have light control on vertical glazing but also to the pyramid roof light above.

Nantmor Blinds installed dim-out roller blinds using a hard-wearing, flame retardant material to the windows. These blinds were operated manually but the rooflight blind obviously needed electrical operation. This rooflight system operates under constant tension so can be stopped at any position. New stage curtains completed this job and shows Nantmor's versatility.
