

## Mediterranean Shipping Company Ipswich, Suffolk

### Products Installed:

160 motorised roller blinds with high performing Verosol SilverScreen fabric

### Project Details:

Nantmor Blinds were involved in an early stage of this project to ensure the expanded UK headquarters of the world's largest shipping company received appropriate shading.

The motorised blinds were operated by radio control switches in banks of four. All blinds used the same material with a thermally efficient backing to reduce heat gain in summer, heat loss in the winter and yet still permit an external view.
