

# Rayleigh Weir Fire Station Rayleigh, Essex

## Project Reference

### **Products Installed:**

Vertical blinds using translucent and blackout material, roller blinds, insect screens to kitchen, lined blackout curtains to dormitory areas.

### **Project Details:**

This was a straightforward project to supply and fit a range of appropriate shading and curtains to a new build but shows Nantmor's ability to provide a complete solution to any blind and curtain requirement.

Nantmor Blinds supplied and installed manually operated roller and vertical blinds with flame retardant materials, some to control glare and provide privacy and some to provide a black-out solution. The project was completed with hand draw curtain tracks and lined, flame retardant blackout curtains.
