

Shorefields School Clacton-on-Sea, Essex

Products Installed:

RL07 gearbox operated, guided roller blinds, RL27C gearbox operated blackout blinds, RL26 motorised blackout blinds, Lightex motorised rooflight blinds, motorised curtains, motorised drop arm awnings.

Project Details:

Another education project that called for a range of products and skills to meet the client's requirements.

External shading was provided to some first floor windows. Internal shading comprised of a range of roller blind systems from manually operated rollers on side guide wires for sloping glazing right up to an electrically operated Lightex roof roller system, fitted horizontally. For the multi-purpose hall a motorised track with blackout curtains provided a simple remote operation but was also linked to the fire alarm system for safety.
