

Wessex Community Centre Bethnal Green, London

Project Reference

Products Installed:

50mm solid slat Venetian blinds (83 number)
RL21 Fully framed black-out blinds (14 number)

Project Details:

This Building Schools for the Future project involved the creation of an IT suite where control of light was essential to prevent screen glare and eye strain for students using the IT equipment.

Nantmor Blinds installed Venetian blinds to all windows, with some fixed at transom level to permit windows to open and allow natural light to enter even when the blinds were fully closed. For areas where total light exclusion was required full frame black out blinds were installed.
